Federal Communications Commission

Commissioner,

I am writing to express my concerns about and persuade the FCC not to allow Broadband over Power Lines (BPL) to be implemented. I feel that emergency communications from our dedicated public safety agencies as well as dedicated volunteer groups such as REACT, the Amateur Radio Community and many other formal and informal groups will be hindered to levels directly responsible for the loss of life. The interference to the shortwave bands is not only a violation of ITU laws that protect international broadcasters from interference and jamming, it will be destroying many people's life hobby. Amateur radio will be reduced to users with high-power amplifiers and large antennas that may or may not be able to minimize the interfering signals. BPL will also hinder military and Federal Government communications putting our Nations security at risk.

Thank you,

Francis J. Creamer Jr
